PROFESSIONAL SUMMARY

Systems Analyst and Backend Developer specialized in **.NET**, with over 3 years of experience designing, implementing, and maintaining **REST APIs** and scalable end-to-end systems. I currently work as a Project Co-Lead in the banking sector, where I coordinate technical tasks, lead **code reviews**, participate in architecture decisions, and mentor developers on the team — all while staying hands-on with day-to-day development. Solid knowledge of **relational databases**, **Clean Architecture**, **SOLID** principles, and the **Microsoft Azure** ecosystem (Azure DevOps, Azure API Management). I complement backend work with frontend and mobile experience (React, React Native) and personal projects I build end-to-end. Progressively taking on greater technical leadership responsibilities. Available for full-time positions and freelance projects.

TECHNICAL SKILLS

Languages & Frameworks: C#, .NET 8 / 9 / 10, .NET Framework, ASP.NET Core, Minimal APIs, REST APIs
Architecture & Best Practices: Clean Architecture, DDD, SOLID, Clean Code, Code Review
Databases: PostgreSQL, MySQL, Oracle (PL/SQL), SQLite, SQL
Cloud & DevOps: Microsoft Azure, Azure DevOps, Azure API Management (APIM), Docker, Kubernetes, CI/CD
Frontend & Mobile: React, Vue, React Native, Expo, TypeScript, HTML, CSS
Tools & Collaboration: Git, GitHub, GitLab, Postman, Draw.io, Microsoft Teams, Agile Methodologies

PROFESSIONAL EXPERIENCE

Backend Developer · Project Co-Lead Mar 2025 – Present
Banco Continental SAECA — Centro Logístico de Tecnología S.A. (CLT)

- Designed and implemented **REST APIs in .NET** for Banco Continental's cards system, a critical platform for the bank's core business.
- Coordinate technical and functional tasks, lead **code reviews**, and mentor developers on the team.
- Participate in architecture decisions focused on scalability, maintainability, and system quality.
- Migrated services to **.NET 9 and .NET 10**, improving performance and maintainability.
- Maintain the API lifecycle in **Azure API Management** (publishing, versioning, and governance).
- Optimized **SQL** queries and defined technical validations prior to each deployment.
- Collaborate on technical planning and requirements analysis, managing repositories, branching, and the integration workflow in **Azure DevOps**.

Technical Support & Developer Jun 2022 – Feb 2025
CI Tech

- Provided direct technical support to clients and resolved production incidents.
- Gathered and analyzed technical and functional requirements with clients.
- Developed desktop applications and **REST APIs in .NET** applying Clean Architecture.

FEATURED PROJECTS

Ecommerce / Point of Sale — API + App (personal project)

- Designed a modular, domain-oriented ecommerce and POS system adaptable to different businesses and multiple branches, built for scalability and maintainability with layered **Clean Architecture** (Api, Application, Domain, Infrastructure) organized by domain (products, categories/attributes, stock, purchases, sales, cash register, invoicing).
- Backend in **.NET 10** (Minimal APIs) with **EF Core + PostgreSQL**, **JWT** authentication with refresh tokens and permission-based authorization, containerized with **Docker**.
- Mobile app in **React Native (Expo)** with separate client and admin panels, consuming the API live.

AlarmasPro — native alarms research (test & learning project)

- Designed and implemented a native alarm engine with **Notifee** (alarm channel, full-screen intent, exact alarms) for an Android/iOS app that truly rings, ignoring silent mode, with a full-screen wake-up over the lock screen.
- Runs on a development build (EAS) without relying on Expo Go. Published on GitHub.

MotorCheck (hobby project, built to give back to the community)

- Implemented a vehicle maintenance tracker with configurable service rules by mileage and time, maintenance history, and due-date alerts.
- **React Native (Expo)** with local storage in **SQLite**.

CERTIFICATIONS

ASP.NET Core & Clean Architecture with DDD (Part 2) — .NET University (25 h)	2025
Master RESTful API with ASP.NET Core Web API (.NET 9) — render2web (13.5 h)	2025
Bootcamp: Building APIs with .NET, Docker and Kubernetes — CLT S.A. (25 h)	2025–2026
Clean Architecture in C# .NET — Héctor de León (10 h)	2025
SOLID Principles and Clean Code — DevTalles (6.5 h)	2025
Advanced Oracle PL/SQL — Apasoft Training (10.5 h)	2025
JavaScript Basics for Beginners — Mosh Hamedani (6.5 h)	2025

EDUCATION

Information Systems Analysis — Universidad Católica Ntra. Sra. de la Asunción
Thesis candidate · Scholarship from ITAIPÚ (knowledge competition)

LANGUAGES & SOFT SKILLS

Languages

Spanish (native) · Guaraní (advanced) · English (intermediate)

Soft skills

Technical leadership · Effective communication · Decision-making · Teamwork · Time management
